WPP Valve Bags

—Strength You Can Rely On.

Save on shipping, warehousing and costly package replacement with these strong, durable, woven polypropylene (WPP) Valve bags. We'll deliver your bags in faster lead times than other imports, and with higher quality standards. Check out the uniformity of our fabric, and you'll notice the difference.

Take a Look at Everything Greif Delivers in Its WPP Valve Bags.

- **Wide Variety of Valve Sleeves** engineered with special film to ease valve closure
- **Strong, Reliable Fabric** saves on shipping, warehousing and costly package replacement
- **Nano-Perf Technology**
- **Specially Designed Top Venting** produces a breathable package—allowing faster, more accurate filling
- **Custom-Designed Coating** for greater coefficient of friction (COF)
- **Available in Coated, BOPP, or OPP**
- **Seamless Tubing** allows for a wide range of fabric weights
- **Custom Top and Bottom Caps** enhance bag shape after filling
- **Fabric can be produced in any color**
- **Reverse or Surface Printing**
- **Made of all recyclable materials**

Quick Turns. Quality Bags.

We offer a full line of industrial and consumer woven polypropylene (WPP) and multiwall bags, and flexible intermediate bulk containers (FIBC), along with the flexibility and connections to get the bag you need when you need it.

Our commitment to quality is uncompromising.

And it's backed by Greif's proven processes for lean manufacturing and Six Sigma principles, prepress quality control procedures and personal sales/service. Added all together we make sure what's on your bag lives up to the same exacting standards as what's in your bag.

Why Greif for Your WPP Bag Needs?

Because they're made with the same superior quality that we put into every Greif Multiwall bag. The quality that you've come to know and trust, and no one can deliver, faster.
